

Market table for merchants with fiberglass h. 80 cm h757_25

Aluminum bench for markets and fairs with thermo-bonded fiberglass. Dimensions: W 150 x D 100 x H 80 cm.

The **H757_25 market table for merchants with fiberglass** is a professional technical bench designed to offer **reliability, hygiene and robustness** in intensive use contexts such as markets, fairs, outdoor events and temporary setups. The structure is made entirely of **aluminum with a 30x18 mm profile** and reinforced by **40x10 mm oval tubes**, ensuring **stability and durability over time**, even with frequent loads.

The worktop is made of **thermo-bonded fiberglass**, an ideal solution for those who need a surface **easy to clean, resistant to impacts and atmospheric agents**.

Assembly via bolts and the **reinforced hinge** guarantee a solid hold, while **special insert profiles** increase the bench's rigidity and simplify assembly operations.

Designed to offer maximum safety during use, the table is equipped with **rounded accident-prevention corners**, which prevent risks of accidental impacts.

The structure is also **prepared for the addition of extensions** (not included), thanks to the integrated attachments on the legs, making the bench flexible and customizable based on operational needs.

Compact, **easy to handle and functional**, it is a perfect solution for merchants looking for a **professional, stable product suitable for continuous outdoor use**.

Buy the **H757_25 market table for merchants** with thermo-bonded fiberglass now, or request a custom quote for multiple supplies!

FAQ:

1. Is the table suitable for outdoor use?

Yes, it is designed to withstand outdoor environments such as markets and fairs.

2. **Is the top really made of fiberglass?**

Yes, the top is in thermo-bonded fiberglass, resistant and hygienic.

3. **Is it possible to mount extensions?**

Yes, the bench is prepared on the legs for adding extensions (not included).

4. **Is the table already assembled?**

It is assembled via bolts, ready for use.

5. **What are the dimensions of the bench?**

The dimensions are 150 x 100 x h 80 cm, ideal for standing display and sales.

Mini buying guide:

When choosing a technical bench for professional use, it is important to evaluate **the quality of the materials**, the **functionality of use** and the **surface resistance**.

The H757_25 model combines a **light but solid aluminum structure**, with a **thermo-bonded fiberglass top**, ideal for those who need a work area **easy to sanitize** and durable over time.

The height of 80 cm makes it perfect for standing activities, while the **preparation for extensions** allows you to adapt it to different operational configurations.

It is a recommended choice for those working in markets, fairs and outdoor exhibition contexts.

Fiberglass market table for merchants, h80 aluminum market bench, table with fiberglass top, folding bench with extensions, technical table for fairs, heavy-duty table for street vending.
