

Market table with fiberglass h. 80 cm h757_24

Aluminum market stall, with heat-bonded fiberglass top. Dimensions: W 200 x D 60 x H 80 cm.

The **H757_24 market table with fiberglass** is a professional technical stall with a height of 80 cm, designed to ensure a **resistant, safe, and hygienic work surface**, ideal for markets, fairs, outdoor events, and temporary setups. This model stands out for its **aluminum structure**, lightweight yet solid, which makes it particularly **easy to transport and install**, even in situations involving frequent assembly and disassembly.

The construction with a **30x18 mm profile** and **40x10 mm oval tubes**, combined with a **reinforced hinge** and bolt assembly, gives the stall high **structural stability**. The support surface is made of **heat-bonded fiberglass**, a material that offers **excellent resistance to moisture, impact, and wear**, while also ensuring a high level of **hygiene and cleanliness**.

The **rounded safety corners** increase the safety of the operator and the public during use, transport, or display. The table is equipped with a **special insert profile**, which reinforces the structure and facilitates assembly. Furthermore, the legs are **pre-arranged for the insertion of extensions** (not included), offering a versatile and customizable solution according to display needs.

Solid, manageable, and functional, this stall is designed for those seeking a practical, professional, and long-lasting product.

Order the **H757_24 table** with fiberglass now or request a quote for multiple supplies: the ideal choice for professional markets and events.
