

Market table with fiberglass h757_23

Technical market bench, with thermo-bonded fiberglass top. Dimensions: W 150 x D 60 x H 63 cm.

The **H757_23 market table with fiberglass** is designed to offer a **solid, hygienic and professional solution** for street vendors, fair exhibitors and merchants who need a compact yet resistant bench. This model is equipped with a **thermo-bonded fiberglass top**, which makes it particularly suitable for activities that require an easy-to-clean, durable surface resistant to wear and humidity.

The supporting structure is made with a **30x18 mm aluminium profile** and **40x10 mm oval tubes**, ensuring **stability and resistance** even in cases of frequent and prolonged use. The assembly system is via **bolts**, a reliable and long-lasting solution. The presence of a **reinforced hinge** further increases the overall sturdiness of the table, making it suitable to be opened and closed multiple times without compromising its hold.

The **safety rounded corners** improve safety during use, transport and setup, reducing the risks of accidental impacts. The **special insert profile** contributes to consolidating the structure and simplifies its assembly. Furthermore, the table is **pre-set on the legs for the insertion of extensions**, offering flexibility in case you want to extend the support surface.

Thanks to its **low weight, maneuverability** and fiberglass finish, this bench is ideal for those looking for a **practical, hygienic and safe work surface**, perfect for display and sales in outdoor markets.

Choose the **H757_23 table** with thermo-bonded fiberglass: direct order or customized quote for multiple supplies available!

Technical features:

- **Structure:** 30x18 mm aluminium profile
- **Oval tubes:** 40x10 mm section
