

Massage and therapy chair with gas spring h930_89

Massage/therapy chair with gas-lift seat, silver aluminum frame and full adjustments. Dimensions: W 55 x D from 50 to 65 x H from 110 to 120 cm.

The **H930_89 massage and therapy chair with gas spring** is designed for **back, shoulder, and neck massage**, ideal for professionals looking for a practical, adjustable, and easy-to-carry solution. The **seat height, headrest height, and armrest angle** adjustments allow the chair to be adapted to the needs of each patient, facilitating correct positioning during treatment.

The **seat** is height-adjustable via a **gas spring**, for a quick and fluid setup. The **aluminum frame** (color **Silver**) makes the structure **lightweight yet strong and stable**; the **low weight (9 kg)** favors **folding and portability**, features that are particularly useful for those who work in multiple environments or even off-site. The seat is upholstered in **synthetic leather**, available in a **wide range of colors**, for good comfort and easy aesthetic integration.

Upon request and **subject to a quote**, it is possible to complete the equipment with a **chest cushion** and **carrying cover**.

Looking for a lightweight and adjustable massage chair with a gas-lift seat? Buy the **H930_89 massage and therapy chair with gas spring** now or request a quote for options and supplies.

- **Comfort:** and personalization with synthetic leather upholstery in many colors.

FAQ:

1. Which treatments is the H930_89 suitable for?

It is used for back, shoulder, and neck massage.

2. How is the seat height adjusted?

The seat height is adjustable via a gas spring.

3. What other adjustments does it offer?

Height-adjustable headrest and adjustable armrest angle.

4. Is it suitable for those who work off-site?

Yes, it is foldable and lightweight (9 kg), so it is easy to transport.

5. Are additional accessories available?

Yes, upon request and subject to a quote: chest cushion and chair carrying cover.

Mini buying guide:

If you work on the back, shoulders, and neck, choose a chair that allows quick adjustments to adapt to different patients: the seat adjustable with a **gas spring**, together with adjustable headrest and armrests, helps to correctly set the posture during treatment. If you move between multiple environments, evaluate portability: an **aluminum** frame and low weight (**9 kg**) make it easier to fold and move the chair. Finally, consider the accessories available on request: **chest cushion** and **carrying cover** can be useful to complete the equipment based on your way of working.
