

Massage chair with aluminum frame h930_88

Back/neck massage chair with silver aluminum frame, adjustable and portable. Dimensions: W 55 x D from 65 to 75 x H from 110 to 120 cm.

The **massage chair with aluminum frame H930_88** is a professional solution designed for **back, shoulder, and neck massage**, ideal for studios, wellness practitioners, and mobile treatments. Thanks to its adjustments, it allows for quick adaptation of the position to the patient's body shape and the type of treatment, improving comfort and operational efficiency.

The **adjustable seat height**, the **headrest**, and the **armrest angle** allow for precise customization: the seat, in particular, is **gradually adjustable**, to easily find the most suitable setup. The **aluminum frame (Silver color)** makes the chair **lightweight yet resistant and stable**, while the **reduced weight** facilitates **folding and portability**, features useful for those performing massages off-site. The seat is upholstered in **synthetic leather**, available in a **wide range of colors**, to combine comfort and aesthetic matching possibilities.

Upon request and **subject to a quote**, it is possible to have a **chest cushion** and **carrying cover** for the chair, to complete the equipment according to needs.

Do you want an adjustable, lightweight, and easy-to-carry massage chair? Buy the **H930_88 massage chair** now or request a quote for options and supplies.

FAQ:

1. **For which treatments is the H930_88 indicated?**

It is used for the massage of the back, shoulders, and neck.

2. **Which adjustments are available?**

Seat height (gradually adjustable), headrest height, and armrest angle.

3. **Is it suitable for transport?**

Yes, the aluminum frame makes it lightweight and the reduced weight allows for easy folding and portability.

4. **What is the maximum capacity?**

The allowed load is 150 kg.

5. **Are additional accessories available?**

Yes, upon request and subject to a quote: chest cushion and carrying cover for the chair.

Quick buying guide:

If you work on the back, shoulders, and neck, choose a massage chair that allows you to quickly adjust the patient's position: adjustable seat, headrest, and armrests help find the correct setup based on body size and treatment. If you move often, portability makes the difference: an **aluminum** frame and a light weight (**10 kg**) make it easier to fold and carry the chair. Finally, consider the accessories: if you want to complete your equipment for itinerant sessions or more organized management, evaluate the **chest cushion** and **carrying cover** (available upon request and subject to a quote).

Massage chair, foldable massage chair, aluminum massage chair, back shoulder neck massage chair, portable massage chair, synthetic leather massage chair, adjustable massage chair, H930_88.
