

Massage table 2 sections with adjustable backrest h725_26

Professional two-section table in painted steel, fixed height 800 mm. Gas-adjustable backrest and class 1IM fire-retardant coating.

The **h725_26 table** is a professional **two-section** support with fixed height, designed to meet the specific needs of medical offices, physiotherapy centers, and wellness-related environments. The load-bearing structure in **painted steel** ensures superior structural stability, essential for supporting therapeutic maneuvers and intensive treatments without bending or instability.

Operational ergonomics is guaranteed by the **adjustable backrest** via a **gas piston** system in a proclive position, which allows for fluid and precise positioning of the patient. To ensure the highest safety standards in collective and healthcare environments, the padding and upholstery are made with **certified class 1IM fire-retardant materials**, available in different color variants for aesthetic integration into professional studios.
