

Termigea anti-decubitus kit with compressor and mattress with interchangeable elements h23006

Termigea anti-decubitus mattress with interchangeable elements with pressure regulation compressor. PVC and nylon mattress consisting of 18 elements. Equipped with cover. Dimensions: Width 98 x Length 200 x h10.9.

The **h23006 anti-decubitus system** consists of a compressor with pressure regulation and an air mattress; suitable for preventing the onset of pressure sores in medium-risk subjects.

The **air mattress** with interchangeable elements promotes, through the alternation of contact points with the patient, blood circulation and good tissue oxygenation. The compressor is equipped with a knob that allows pressure adjustment according to the patient's weight and can be placed on the ground as it is equipped with four feet or can be hung on the bed rail thanks to the two practical hooks.

The mattress is made of **medical grade PVC**, subjected to an antibacterial treatment and consists of **18 interchangeable elements**, which inflate alternately, fixed with snap buttons, which facilitate replacement in case of breakage and allow for cleaning.

Mattress features:
