

Maze game for playground h575_144

Vertical aluminum maze with tubes at different heights for playgrounds. Develops logic and spatial orientation. Age 3-11 years, structure 254x193xH166 cm.

The **vertical maze** is playground equipment designed to stimulate children's **logical and intuitive skills**, facilitating the development of a **sense of spatial orientation**. The structure combines vertical and horizontal paths through tubes positioned at different heights, creating a play space that encourages free movement: children can crawl, slide, and climb in total safety.

Made with **90 x 90 mm aluminum posts** and **33 x 3 mm powder-coated tubes with rounded corners**, the maze guarantees robustness and the absence of dangerous sharp edges. It is suitable for **age groups 3-11 years** and supports the simultaneous use of multiple children.

Technical characteristics

- **Structure material:** aluminum
- **Overall dimensions:** 254 x 193 x H. 166 cm
- **Age range:** 3 – 11 years
- **Required safety area:** 554 x 493 cm
- **Maximum fall height:** 145 cm
- **Required safety surfacing:** 27.3 sqm
- **User capacity:** 3 or more children simultaneously
