

Medical baby scale h585_51

Professional medical baby scale. Max capacity 15 kg.

Baby scale with a modern design, equipped with a **large support surface** ergonomically optimized, to weigh infants in complete safety. Non-delicate plastic support surface. Hygienic and easy to clean. The structure is particularly flat and lightweight, therefore easy to transport and store. **Secure and non-slip support** thanks to height-adjustable rubber feet. Very simple to use. **Data Hold function**: for convenient reading of the displayed weight. Special function for neonatology departments: Differential function for calculating weight gain before and after food intake. Internal memory of the weighing value for one weighing value. **AUTO-OFF function** to save batteries. Possibility to change measurement units from kg to lb.

Technical features:

- Max capacity: 15 kg
- Graduation: 0.01 kg
- Auto-Off function
- Data Hold function
- LCD display
- Support surface dimensions: W.560xD.225 mm
- Total dimensions: W.650xD.350xh.55 mm
