

Medical equipment cart with drawers h930_67

Medical equipment cart in steel/aluminum with drawers, adjustable shelves and high and low side profiles. Dimensions: W 53 x D 41 x H 121 cm.

The **H930_67 medical equipment cart with drawers** is a highly professional solution designed for the **safe transport and organization of medical devices** in hospital environments, operating rooms and outpatient departments. Thanks to its **tall, modular and compact structure**, it offers maximum efficiency in the daily operations of healthcare personnel.

Made with a **powder-coated steel structure** and **vertical aluminum profiles**, this cart guarantees **robustness, durability and ease of sanitization**. The product is available with a **high profile** and **low side profile**. Upon request, it is also possible to provide identical standard profiles on both sides. The different profiles are suitable for positioning **IV drips or cable supports**. The **steel trays and drawers** offer stable support surfaces, suitable for positioning light medical devices such as patient monitors, defibrillators, infusion pumps and laboratory instruments.

The H930_67 cart stands out for the **possibility of adjusting the height of both shelves and drawers** along the vertical aluminum profiles. This modular system allows staff to **customize the internal configuration** based on the type of equipment used, optimizing operational ergonomics and facilitating access to devices.

Equipped with **four swivel wheels with brakes**, the cart offers **safe maneuverability even in tight spaces** and the necessary **stability during use**, even in surgical environments where precision and control are required.

Maximize efficiency and safety in your department with the **H930_67 cart**. Order now or request a custom quote for your healthcare facility!

Technical features:
