

## Medical equipment trolley with 3 shelves h583\_31

Medical trolley for medical equipment, with 3 shelves 60 x 43 cm, double aluminum column and Ø 80 mm wheels. Dimensions: W 68 x D 56 x H 110 cm.

The **H583\_31 medical equipment trolley** is a professional and functional solution for the transport and organization of **medical equipment and diagnostic devices**. Made with high-quality materials, it is designed for daily use in **hospitals, clinics, medical offices and healthcare laboratories**, where efficiency, safety and mobility are essential.

The structure is composed of **two extruded aluminum columns**, which offer **sturdiness and lightness**, facilitating movement even in the tightest spaces. The **3 shelves measuring 60 x 43 cm** are equipped with **ABS corner caps** that act as bumpers, protecting surfaces from accidental impacts and ensuring greater durability over time.

The **tubular base** is designed with **ABS bumper caps**, which add protection to the structure and surrounding surfaces during movement.

The trolley is equipped with **4 Ø80 mm wheels**, **2 of which with brakes**, to allow smooth movement and **secure locking during use**, improving operability even on slippery or inclined floors.

Make the management of your equipment more efficient and safe with the **H583\_31 trolley**. Contact us now for more details or to request a personalized quote.

### Technical features:

- **Structure:** double extruded aluminum column
- **Base:** tubular with ABS bumper caps
- **Shelves:** 3 shelves 60 x 43 cm with ABS corner bumper caps
- **Wheels:** 4 Ø80 mm wheels, 2 of which with brakes
- **Height:** 110 cm
- **Total width:** 68 cm
- **Total depth:** 56 cm

### User benefits:

- **Structure:** light and resistant in aluminum.
- **Three large shelves:** ideal for organizing medical devices.
- **ABS corners:** for greater impact protection.
- **Swivel wheels:** with brakes for safety and ease of movement.
- **Design:** compact for use even in environments with limited space.

### FAQ:

1. **Is the trolley suitable for transporting healthcare equipment?**  
Yes, it is specifically designed to safely support medical instrumentation.
2. **Are the shelves protected from impact?**  
Yes, thanks to the integrated ABS corner caps on each shelf.
3. **Do the wheels have a locking system?**  
Yes, 2 of the 4 wheels are equipped with brakes to ensure stability.

4. **Is the structure easy to sanitize?**

Yes, the materials used are resistant and easily sanitizable.

5. **Is it also suitable for small environments?**

Yes, thanks to its compact dimensions and high maneuverability.

**Mini buying guide:**

To ensure **order, safety and mobility** in clinical and hospital environments, a 3-shelf trolley is an ideal choice.

The H583\_31 model combines **protection, compactness and stability**, thanks to the presence of **extruded aluminum columns, ABS protected shelves** and **wheels with brakes**.

Perfect for those looking for a **reliable solution for managing medical devices**.
