

Medical equipment trolley with extruded aluminium column h583_26

Trolley for electromedical devices with Ø 80 mm wheels and 400 x 360 mm shelf. Structure dimensions: W 500 x D 450 x H 820 mm.

The **H583_26 medical equipment trolley** is a functional, compact and robust solution, designed for the support and movement of **medical instrumentation and equipment**. Thanks to its **stable structure** and **extruded aluminium column**, this trolley is ideal for **healthcare environments, clinics, medical practices and hospital wards**, offering a practical and safe mobile workstation.

The **tubular base** is made with **ABS bumper caps** to protect surfaces and surrounding elements from accidental impacts. The entire structure is treated with **epoxy coating** in a thermal tunnel at **200°C**, to ensure **durability, mechanical resistance and protection from chemical agents**.

The **400 x 360 mm upper shelf**, in painted steel, offers a solid surface for supporting medical devices and is designed to ensure **maximum operational practicality** during use.

The **4 Ø80 mm wheels** ensure **smooth manoeuvrability**; the **two front wheels are equipped with brakes**, ensuring a **safe lock during use**, and the possibility of **easy transport** on different types of flooring.

Optimize the management of your electromedical equipment with the **H583_26 trolley**. Buy it now or request a personalized quote for healthcare facilities.

Technical features:

- **Structure:** tubular with ABS bumper caps
- **Column:** in extruded aluminium
- **Coating:** epoxy at 200°C in thermal tunnel
- **Shelf:** 400 x 360 mm
- **Height:** 820 mm
- **Front base depth:** 450 mm
- **Rear base depth:** 500 mm
- **Base width:** 450 mm
- **Wheels:** Ø 80 mm
- **Brakes:** 2 front wheels with brake

Optional:

- **Basket:** mesh

User benefits:

- **Structure:** stable and compact, ideal for cramped healthcare environments.
- **Easy:** to move thanks to the swivel wheels.
- **Front brakes:** for use in total safety.
- **Column:** lightweight and resistant aluminium.
- **Shelf:** functional for housing medical equipment.
- **Finish:** durable with epoxy powder coating.

FAQs:

1. **Are the wheels brakable?**
Yes, the two front wheels are equipped with a parking brake.
2. **Can the column support accessories?**
Yes, the extruded aluminium column is compatible with the installation of accessories.
3. **Is the shelf removable?**
The shelf is fixed to the structure to ensure stability during use.
4. **Is it suitable for use in hospital environments?**
Yes, it is designed for use in professional healthcare environments.
5. **Is the structure resistant to chemical agents?**
Yes, thanks to the high-temperature epoxy coating.

Mini buying guide:

When moving medical equipment, always choose a trolley with a **robust structure, modular column, large and stable shelf and braking wheels**.

The H583_26 is perfect for practices, diagnostic departments and clinic areas thanks to its **practicality, ease of transport and durability over time**.

Check the measurements based on the available space and consider adding optional accessory supports.

Medical equipment trolley with wheels, medical device trolley on wheels, mobile unit for healthcare equipment, trolley with extruded aluminium column, medical trolley with brakes.
