

Medical examination couch adjustable height h904_31

H904_31 portable medical couch in aluminum, adjustable height 68-84 cm. Lightweight (13 kg) and resistant, ideal for physiotherapy and medical clinics.

The **h904_31 medical examination couch** is a professional device designed for clinical, rehabilitative and wellness contexts, such as **clinics, physiotherapy studios and massage centers**. The choice of **aluminum** for the structure guarantees an excellent ratio between mechanical resistance and lightness, facilitating movement or transport operations of the couch without compromising stability during use.

The work surface is equipped with **manual height adjustment** in a range between 68 and 84 cm, allowing the operator to set the most correct ergonomic position based on the treatment to be performed. Patient comfort is ensured by **high-density foam padding** with a thickness of 3 cm and an **integrated adjustable headrest**, which promotes relaxation of the cervical spine. The **eco-leather** upholstery has been selected for its wear resistance and ease of sanitization, fundamental requirements for maintaining health and hygiene standards.
