

Medical examination couch h583_19

Professional steel couch for examinations and massages, 185x70 cm, with 70° adjustable backrest and 180 kg high-resistance structure.

This **one-joint and two-section couch** has been designed for professional use in medical, physiotherapeutic, and massage therapy fields. The supporting structure is made of solid **30 x 30 mm tubular steel** with a thickness of 3 mm, treated with oven-baking at 200°C with epoxy-polyester powders. This process ensures a highly durable **scratch-resistant textured white** finish. The support surface features 6 cm padding covered in **skay**, a material chosen for its resistance and ease of maintenance.
