

Medical examination table with adjustable height h666_22

Medical examination couch with electric height adjustment. Load capacity: 200 kg. Height: adjustable from 49 to 89 cm.

The medical examination table is the ideal product for private medical practices and clinics where specialist medical examinations are performed daily. **The product features comfortable padding with 60 mm thick foam, available in various colors.** The base of the couch is extremely resistant and at the same time practical and versatile, so as not to interfere with cleaning operations: **thanks to the two telescopic columns system, the couch is extremely stable. An electric adjustment system allows the height of the table to be adjusted from 49 to 89 cm, while the backrest is adjustable via a gas spring system.**

Finally, the product is equipped with 4 sturdy Ø125 mm wheels with a brake on each wheel.
