

Medical office screen h930_05

Two-section hospital screen in washable cotton. Dimensions: 134x48x165 cm. Patient privacy in outpatient clinics and clinics.

The hospital screen is an essential tool in healthcare environments to guarantee **patient privacy and dignity** during medical examinations, diagnostic procedures, and clinical check-ups. Designed specifically for outpatient clinics, clinics, and medical offices, it combines structural lightness with operational robustness, allowing easy movement without compromising stability.

The **washable cotton** panels ensure optimal hygiene and compliance with healthcare protocols, allowing frequent cleaning and sanitization cycles. The lightweight structure facilitates daily management, while the two-section configuration offers versatility in space separation.

Technical features

- Configuration: two-section
- Length: 134 cm
- Depth: 48 cm
- Height: 165 cm
- Panel material: washable cotton
- Structure: lightweight and resistant
