

Medical surgery step stool h13_123

Single-step stool in tubular steel for clinics, non-slip platform 40x20 cm, capacity 90 kg, made in Italy.

Step stool specifically designed to facilitate access to examination couches in medical offices and clinics. The **tubular steel** structure guarantees stability and durability, while the **rubber feet** ensure adherence to the floor and protection from accidental mobility. The **grey non-slip plastic** platform (40x20 cm) is the tread surface, designed to reduce the risk of slipping even in environments with humidity. A functional and reliable element for healthcare contexts that require safety in patient accessibility.

Technical features

- Tubular steel structure
- Rubber feet
- Grey non-slip plastic platform (40x20 cm)
- Number of steps: 1
- Maximum capacity: 90 kg
- Dimensions: 40x51xh.25 cm
