

Step stool for medical office 1 step h13_121

Single-step stool for clinics in chrome-plated steel tube with non-slip platform. Capacity 100 kg, 40×24 cm, Italian production.

The step stool for medical office represents an essential aid in clinics and healthcare facilities to facilitate patient access to examination tables. It reduces effort during ascent and descent, improving comfort and safety, especially for elderly patients or those with reduced mobility.

The structure is made of **chrome-plated steel tubing**, which guarantees robustness and resistance to corrosion typical of humid environments. The platform is made of **non-slip black plastic**, a fundamental element for preventing slips during use. The **rubber feet** ensure stability on the floor and protection of surfaces.

Technical features

- Structure in chrome-plated steel tube
- Rubber feet for stability
- Non-slip black plastic platform
- Steps: 1
- Maximum capacity: 100 kg
- Dimensions: 40 × h.24 cm
- Supplied disassembled
- Made in Italy
