

Medical polyester backpack h13_306

Water-repellent 600D polyester medical backpack (40x25x47 cm) with 6 modular pouches and reflective strips for professional emergency rescue.

The **medical backpack h13_306** is a professional transport unit designed for the efficient organization and movement of medical supplies in emergency contexts. The structure is made of **water-repellent 600D polyester** with an internal PVC coating, a combination that ensures high abrasion resistance and protection of the contents against atmospheric agents and moisture. The internal design is optimized for speed of action, thanks to a modular compartmentalization that allows healthcare workers to immediately identify the necessary instrument sets.

Technical features

- **Material:** Water-repellent 600D polyester with technical PVC coating
- **Dimensions:** 40 x 25 x h 47 cm
- **External pockets:** 2 front pockets and 2 side pockets for quick access
