

Medical screen for clinical use h930_10

Adjustable medical screen with polyester-cotton panel (200x144 cm), height 150–170 cm, depth 51 cm. Acoustic and visual isolation for clinics and hospitals.

The medical screen is a professional solution designed to ensure **patient privacy and visual isolation** in clinical environments, hospitals, and medical offices. The adjustable structure allows for rapid adaptation to available spaces, supporting various configurations of use without the need for fixed installations.

The **polyester-cotton** panel combines mechanical resistance with ease of sanitization, essential features in high-frequency healthcare contexts. The material is treated to ensure durability and hygiene over time.

Technical specifications

- Panel: polyester-cotton
- Panel dimensions: 200 x 144 cm
- Adjustable length: 70–200 cm
- Depth: 51 cm
- Adjustable height: 150–170 cm
