

Medical screen for clinics h930_11

Single-section medical screen with PVC panel and metal structure. Dimensions 94x58x165 cm. Visual isolation for healthcare environments.

The screen is an essential solution for **clinics and hospitals** that need to create **privacy and visual isolation** zones during medical examinations, treatments, and diagnostic procedures. The combination of a **PVC** panel and a resistant metal structure ensures both **durability over time** and effective space separation, adapting to various environmental configurations typical of healthcare contexts.

Technical characteristics

- Configuration: one section
- Panel: PVC
- Length: 94 cm
- Depth: 58 cm
- Height: 165 cm
- Structure: resistant metal
