

## Medical stainless steel instrument trolley h13\_309

AISI 304 stainless steel trolley with 4 sliding drawers and lock. Dimensions: 60 x 40 x h 110 cm

The **stainless steel instrument trolley** is a professional solution ideal for medical, hospital, and laboratory environments. Made of **AISI 304 satin-finish stainless steel**, it guarantees robustness, ease of cleaning, and corrosion resistance, which are essential features for use in sterile environments. Equipped with **4 sliding drawers on guides**, the first with a **key lock** to protect sensitive instruments. The **upper top with raised edges on four sides** prevents objects from accidentally falling during movement. The **4 swiveling wheels Ø 80 mm** ensure maneuverability on any surface.

**Made in Italy**, it is a product of superior quality, designed to facilitate the organization and transport of instruments in professional settings.

**Order now** and improve your operations with a reliable and resistant trolley.

### Technical features:

- **Material:** AISI 304 satin-finish stainless steel structure.
- **Drawers:** 4 sliding drawers (internal measurements 49 x 33 x h 18 cm), the first with a key lock.
- **Upper top:** Edged on four sides for greater safety.
- **Wheels:** 4 swiveling wheels Ø 80 mm for smooth movement.
- **Dimensions:** 60 x 40 x h 110 cm.

### User benefits:

- **Maximum hygiene:** Resistant and easy-to-clean materials.
- **Safety:** Edged top and drawer with lock for delicate instruments.
- **Ease of movement:** Swiveling wheels for simple and fast maneuverability.
- **Optimal organization:** Ample space to organize and protect instruments.

### FAQ:

- 1. Are the drawers removable for cleaning?**  
Yes, the drawers can be easily removed for thorough cleaning.
- 2. Does the trolley arrive assembled?**  
Yes, the trolley is delivered already assembled and ready for use.
- 3. Do the wheels have a locking system?**  
No, but braking wheels are available as options on request.
- 4. What is the load capacity of the upper top?**  
The upper top can support up to 15 kg evenly distributed.

### Mini buying guide:

When choosing an instrument trolley, consider:

- **Material quality:** prefer stainless steel for hygiene and durability.
- **Safety:** locks to protect important instruments.
- **Mobility:** quality wheels for smooth movement.
