

Medical office 2-step stool h904_01

2-step medical step stool in steel, 37x43x39 cm. Stable structure to facilitate safe access to examination couches and seating in healthcare settings.

The professional step stool **h904_01** is an indispensable complement for medical offices, clinics and surgeries, designed to ensure safe and easy access to examination couches or high-seated chairs. The **two-step** structure is designed to offer a smooth progression in height, minimizing physical effort for the patient and ensuring maximum operational stability for healthcare personnel.

Made entirely of **painted steel**, this model combines mechanical strength and a clean design, ideal for integration into professional contexts where reliability is a primary requirement. The compact configuration allows versatile positioning even in environments with limited space, without compromising the supporting surface necessary for a safe climb.
