

Step stool for medical practice h13_120

Chrome-plated steel step stool for clinics, 2 steps, non-slip platform, 100 kg capacity, Italian production.

The **medical practice step stool** represents a practical and reliable solution for facilitating patient access to the examination couch. Designed specifically for outpatient environments and healthcare facilities, it combines structural robustness with safety of use, solving the need for a stable and hygienic aid for assisted climbing.

The **chrome-plated steel tube** structure ensures durability over time and ease of cleaning and sanitization, fundamental elements in the medical field. The **rubber feet** ensure a stable base and protect the floor from wear. The platform is covered in **non-slip black plastic**, which prevents slipping even in the presence of moisture.

Technical features

- Structure: chrome-plated steel tube
- Rubber feet
- Number of steps: 2
- Platform: non-slip black plastic
- Dimensions: 40 × h. 42 cm
- Maximum capacity: 100 kg
- Production: Italy
- Supply: disassembled
