

Medical step stool for clinics h709_20

Medical 3-step stool in chromed steel (45x87x64 cm) with non-slip platforms, ideal for facilitating access to examination couches.

The **h709_20 medical step stool** is an indispensable professional aid to ensure safety and comfort within healthcare environments. Designed specifically to facilitate patients climbing onto and descending from examination couches, this support proves essential in contexts where ergonomic access is a clinical priority.

The structure is entirely made of **chromed steel tubing**, a material chosen to combine high mechanical resistance with a surface that is easy to sanitize. The three steps are equipped with **foot platforms with non-slip coating**, designed to offer a secure grip for footwear even in conditions of reduced mobility.
