

## Medical step stool for clinics with 2 steps h709\_23

2-step medical stool in white painted steel, 45x55x43 cm. Non-slip platforms for safe and stable access to clinical examination couches.

The **h709\_23** step stool is a technical furnishing accessory designed for use in **medical clinics, specialist offices, and analysis laboratories**. Its primary function is to facilitate patient access to examination couches or technical chairs, ensuring safe support even for individuals with reduced mobility or during complex diagnostic procedures.

Made with a tubular **white painted steel** structure, the stool integrates two spacious steps equipped with a high-grip walking surface. The choice of materials ensures high structural resistance and a long operational life, meeting the hygiene and reliability needs typical of the healthcare sector.
