

Medical step stool h573_16

Single-step stool for clinics in 18/10 stainless steel with non-slip base, dimensions 450×250×250 mm.

The step stool for clinics and medical offices facilitates patient access to the examination couch, allowing for a comfortable and safe ascent without effort. It is an essential solution in medical contexts where accessibility is critical, particularly for elderly patients, those with reduced mobility, or post-surgery.
