

Medical office step stool with 1 step h709_22

Single-step medical stool in stainless steel (45x21x25 cm) with non-slip surface, designed to facilitate access to examination couches.

The **h709_22 professional step stool** is an auxiliary device designed for healthcare settings, medical offices, and specialist clinics. Its primary function is to facilitate patient access to examination couches in total safety, reducing the height difference and ensuring stable support. The structure, made entirely of **stainless steel tubing**, ensures long-lasting resistance to corrosion and the frequent sanitization cycles necessary in sterile or clinical environments.
