

Medical stool with foot control h904_24

Stool for medical practices with foot control. Ergonomic seat. Dimensions: W. 50 x D. 50 x h. from 60 to 85 cm.

Medical stool essential for healthcare personnel, designed to ensure **comfort and functionality** in professional settings. Made with a **solid metallic structure**, this stool stands out for its **robustness and durability over time**, while the **aluminum base** ensures stability and resistance. One of the main features of this stool is the **ergonomic and tilting seat**, designed to adapt to the needs of the user, allowing for correct posture and reducing fatigue during working hours. The **seat is padded with 2 cm thick semi-hard foam**, offering comfortable support without compromising solidity. The **seat height is adjustable from 60 to 85 cm**. The practical **foot control**, allows medical staff to easily find the optimal position based on different activities and specific needs. This stool, **without backrest**, allows for greater freedom of movement and facilitates operations in confined spaces, making it ideal for various medical environments, including clinics, laboratories and operating rooms. It is **supplied disassembled**, with detailed instructions for easy and quick assembly. The **upholstery** of the seat is available in **different colors**.
