

Medical stool with footrest h449_175

Technical stool for clinics with polyurethane seat. Dimensions: D 63 x H from 100 to 125 cm.

The **H449_175 medical stool** is a technical seat designed to guarantee **ergonomics, resistance, and hygiene** in healthcare environments. Suitable for medical offices, clinics, laboratories, dental practices, and clinics, this stool offers **precise adjustment of the backrest** in both height and depth, allowing the operator to maintain a **correct posture** even during prolonged use.

The **seat is made of integral polyurethane**, a material that is easily washable, resistant to wear and disinfectant products, ideal for environments where hygiene is fundamental. The integrated **footrest** further improves comfort and support, especially during activities that require precision and stability.

The dimensions are designed to ensure maximum functionality: the backrest has a height of 31 cm and a width of 42 cm, while the seat measures 46 x 44 cm. The seat height is adjustable from 61 to 87 cm, as is the overall height, which varies from 100 to 125 cm. With a weight of 11 kg, the stool is robust yet easy to move.

The **H449_175 stool** is the perfect choice for those looking for a **professional, reliable, and durable** seat, in line with the comfort and safety needs typical of the healthcare sector.

Buy the **H449_175 medical stool** now to ensure comfort and correct posture for your staff. Contact us for large-scale supplies or for more technical information.

FAQ:

1. Is the stool suitable for prolonged use?

Yes, it is designed to guarantee comfort and ergonomics even in the case of continuous use during long shifts.

2. Is the seat easy to clean?

Yes, integral polyurethane is easily washable and resistant to medical detergents and disinfectants.

3. Is it height adjustable?

Yes, both the seat (61-87 cm) and the backrest (in height and depth) are adjustable to adapt to the operator.

4. Is the footrest removable?

No, the footrest is integrated into the structure of the stool and designed to offer continuous support.

5. Is the stool equipped with wheels?

Yes, the stool is equipped with wheels.

Mini buying guide:

When choosing a stool for medical offices or laboratories, it is important to focus on **ergonomics, hygiene, and durability**.

Models with an **integral polyurethane seat** are ideal because they are easily sanitized and resistant to chemical agents.

Multiple adjustments, in particular of the backrest and height, allow the stool to be adapted to different workstations and reduce the risk of muscle fatigue.

An **integrated footrest** is recommended to ensure greater stability and comfort in prolonged activities.

Ensure that the stool has a solid but not excessively heavy structure, to facilitate movement within the working environment.
