

Medical clinic step stool h709_17

Medical step stool with 3 steps, chrome-plated steel frame, non-slip platforms. Dim. 47x87x64 cm. For examination couches.

The step stool is an indispensable accessory in healthcare environments to facilitate safe and independent patient access to examination couches. Specifically designed for hospitals, medical offices, and physiotherapy practices, it reduces the risk of falls and facilitates getting on and off movements, particularly for patients with reduced mobility, the elderly, or those in the recovery phase.

Technical characteristics
