

Medical Thermal container 22 liters h18414

Handy thermal storage capacity of 22 liters. High autonomy of maintaining temperature

Thermal container with **polyethylene** structure deformable gray both internally and externally. Polyethylene is a plastic material highly prized for its virtues. It':

- odorless
- light
- non-toxic
- easily washable
- resistant to stains, moisture, heat, acids and wear

It 'easy to carry thanks to adjustable shoulder strap. The cover is made of the same material and with the same insulation of the shell. The **'insulation** is polyurethane foam (density 40 kg / m³) with a thickness of 35 mm. CFC and HCFC free. Thanks to the high insulation coefficient, the container ensures high autonomy of temperature maintenance.

The cover is also equipped with a rubber seal to guarantee a perfect seal and two hooks lever made of plastic material of black color with elastic sealing.

Features:

- capacity 22 liters
- Dimensions (WxDxH) 39x37x31 cm
- net weight of 4.2 kg
