

2-Step Wooden Medical Footstool h582_25

Beechwood medical footstool with 2 steps, non-slip surface, 40x41.5x36 cm. Water-based paint for clinics.

The medical footstool is an essential accessory in clinics and healthcare facilities to facilitate patient access to examination tables and work surfaces. Made of **beechwood**, it guarantees solidity and durability over time, while the **non-slip surface** ensures maximum safety during use. The **2-step** structure allows for gradual and comfortable access, reducing the physical effort of patients and improving the overall ergonomics of the clinic.

The product is finished with **water-based paints**, ensuring non-toxicity and compliance with health standards. It represents a practical and reliable solution to ensure comfort and safety in medical spaces.

Technical features
