

## Medication protection safe h718\_14

Medication safe with double wall, 5 aluminum drawers and 2 shelves. Dimensions W.60xD.50xh.140 cm. Certified EN 1143-1 Grade I. Floor anchoring included.

Specialized safe for the secure storage of high-value medications and controlled substances, such as narcotics. Designed specifically for healthcare facilities, hospitals, hospital pharmacies, and pharmaceutical laboratories, it protects against robberies, mechanical and thermal break-ins, as well as internal theft. The **double wall** makes opening with traditional burglary tools extremely difficult or impossible, ensuring a higher level of protection compared to standard safes.

The interior is organized into **5 extractable aluminum drawers with dividers** to quickly subdivide and locate different types of medications, complemented by **2 extractable shelves** for flexible space management. Each drawer offers a useful space of W.45xD.30 cm with a height of 12.5 cm between drawers, ensuring adequate capacity for standard medicine containers.

## Technical features
