

## Medicine storage safe h718\_26

Double-walled safe for medicines, 4 aluminum drawers, 180 lt, floor anchoring, EN 1143-1.

Specialized safe for the protection and storage of medicines, narcotics, and medical prescriptions in critical environments such as pharmacies and hospitals. Designed to safeguard high-value drugs and therapeutically significant items from threats of robbery, theft, and burglary.

The **double-walled** structure guarantees mechanical resistance and passive protection. The interior is organized with **4 extractable aluminum drawers**, each complete with dividers for the segregation and order of medicines. Each drawer offers a usable space of 45 × 30 cm with a 12.5 cm center distance between shelves, allowing flexibility in the arrangement of items. The key lock ensures access control, while the provision for floor anchoring (with fixing material included) eliminates the risk of the entire cabinet being removed.

## Technical characteristics

- External dimensions: W. 60 × D. 50 × h. 100 cm
- Internal dimensions: W. 52.8 × D. 36.5 × h. 93.5 cm
- Volumetric capacity: 180 liters
- Operating weight: 325 kg
- Construction: double wall
- Internal drawers: 4 aluminum units, extractable, equipped with dividers
- Usable space per drawer: 45 × 30 cm
- Usable height between drawers: 12.5 cm
- Handle: 42 mm protrusion
- Anchoring: provision for floor fixing, material included
- Closure: key lock
- Safe certification: **EN 1143-1** (burglary protection)
- Lock certification: **EN 1300** (security performance)
