

Meeting table h908_105

Multipurpose table with flip-top and horizontally stackable. Dimensions: W 180 x D 80 x H 75 cm.

The **multipurpose meeting table with flip-top h908_105** is the ideal choice for those looking for a practical and versatile solution for professional spaces such as meeting rooms, auditoriums, and multifunctional environments. With a **large 180 x 80 cm top**, it offers a comfortable work surface, suitable for housing documents, electronic devices, and presentation materials. Its **sturdy metal structure** guarantees stability and long durability, even in conditions of frequent and intensive use. The main feature of this table is the **top flipping mechanism**, which allows for horizontal stacking of multiple tables, maximizing available space and facilitating the cleaning and maintenance of the rooms.

Equipped with **integrated wheels**, the table can be easily moved and positioned wherever necessary, quickly transforming the room layout. Each wheel is equipped with a **locking system**, ensuring that the table remains firm and stable when used. This feature is particularly useful in contexts where safety is essential, such as workshops and training sessions. The surface of the top is designed to be resistant to impacts and abrasions, maintaining a professional appearance even after years of use. Thanks to its intelligent design, the table is suitable for modern and dynamic environments, where flexibility and adaptability are key elements.

Enhance the functionality of your meeting rooms with our **flip-top meeting table h908_105**. Join those who have already improved space management and the organization of their work environments. **Buy now** or contact us to receive a custom quote for your needs!

FAQ:

1. **Is the table easy to open and close?**
Yes, the flip-top closing system is intuitive and allows the top to be opened and closed quickly for efficient use.
2. **Can the wheels be locked to ensure stability?**
Yes, the wheels are equipped with a locking system to keep the table stable and safe during use.
3. **What material is the top made of?**
The top is made of impact-resistant and easy-to-clean material, ideal for high-traffic environments.
4. **Is it available in other sizes?**
The dimensions of this model are W 180 x D 80 x H 75 cm. Other options can be requested upon quote.

Mini buying guide:

When choosing a **flip-top meeting table**, it is important to evaluate the size of your room and the frequency with which the table

will be moved or stacked. A table with a **sturdy metal structure** guarantees stability and resistance, making it suitable for intensive use environments such as conference rooms and classrooms. The **integrated wheels** are an advantage for those who want easy mobility, while the locking system ensures that the table remains stable during use. The ability to stack tables horizontally allows you to optimize available space, facilitating cleaning and environment management. Also consider the height of the table and compatibility with existing seating to ensure maximum comfort during meetings.
