

Metal animal stretcher h938_02

Animal stretcher with removable wheels and brakes. Total dimensions: L 100 x D 55 x h 96.6 cm.

The **animal stretcher with support h938_02** is designed to facilitate the safe and comfortable transport of animals in veterinary clinics, surgeries and shelters. Its **aluminum structure** ensures excellent robustness while maintaining a low weight, making it easy to maneuver. The **washable nylon cover** ensures quick and effective cleaning, indispensable for maintaining high standards of hygiene during the transport of animals.

The **removable wheels**, equipped with **safety brakes**, allow the stretcher to be locked in position, providing stability both during transport and when the animal needs to be placed on the stretcher or removed from it. This system ensures that movements occur in a smooth and safe manner, preventing sudden movements that could agitate the animal.

The stretcher has a **maximum load capacity of 60 kg**, suitable for both small and medium-sized animals. The **compact dimensions** make it easy to handle even in confined spaces, such as veterinary clinic corridors or animal ambulances. Ideal for veterinarians and professionals in the sector, this stretcher represents a versatile solution for improving the management and care of animals during transport.

Don't wait! Purchase the **h938_02 animal stretcher** with wheel support today and improve safety and comfort in the transport of your four-legged patients. Contact us to request a personalized quote or further information. Ensuring safe transport has never been so easy!

Technical features:

- **Structure:** Resistant and lightweight aluminum
- **Cover:** Washable nylon for quick and hygienic cleaning
- **Wheels:** Removable, with brakes for greater stability
- **Load capacity:** Up to 60 kg
- **Total dimensions:** L 100 x D 55 x h 96.6 cm
- **Trolley dimensions:** L 82 x D 55 x h 85 cm
- **Stretcher dimensions:** L 100 x D 50 x h 11.6 cm

User benefits:

- Ease of cleaning thanks to the washable nylon cover
- Safety guaranteed by wheels with brakes
- Easy to handle even in confined spaces
- Lightweight and resistant for safe animal transport

FAQ:

1. **Is the stretcher suitable for animals of all sizes?**
The stretcher has a maximum load capacity of 60 kg, suitable for small and medium-sized animals.
2. **Are the wheels removable?**
Yes, the wheels can be easily removed for more versatile use.
3. **Is it easy to clean?**
Yes, the nylon cover is washable and resistant, ensuring optimal hygiene.
4. **Do the wheels have brakes?**
Yes, the wheels are equipped with brakes to ensure stability and safety during transport.
- 5.

Mini buying guide:

When purchasing an **animal stretcher**, it is important to consider the **load capacity** and **mobility**. A stretcher with an **aluminum structure** is ideal for ensuring lightness and durability, while **wheels with brakes** allow for greater safety during movement.

The **washable cover** is an essential element in veterinary contexts, where hygiene plays a crucial role. Furthermore, ensure that the **dimensions** of the stretcher are adequate for the spaces of the clinic or shelter, to facilitate the transport of animals even in small environments.
