

Metal cone holder trolley h286_63

Metal trolley in steel sheet for the transport of 55 bushings. Blue rubber wheels Ø 125 mm. Dimensions: W 70 x D 60 x H 145 cm.

The **cone holder trolley H286_63** is designed for the **safe and organized transport of bushings** in production departments, mechanical workshops, and metalworking industries.

Made of **sturdy steel sheet**, it guarantees **stability and resistance to heavy loads**. The design allows it to accommodate up to **55 bushings** of different types, including **ISO-50, CAPTO 8, VDI 30-40-50 and HSK 80-100**.

The **blue rubber wheels Ø 125 mm** (2 fixed, 1 swivel and 1 swivel with brake) ensure **smooth movement and total control**, while the **ergonomic handle** facilitates transport.

The **blue RAL 5010 epoxy powder coating** protects the structure from **wear, rust and chemical agents**, guaranteeing high durability.

Choose the **cone holder trolley H286_63** for efficient and safe transport of bushings! Request a personalized quote now.

Technical features:

- **Material:** sturdy steel sheet
- **Dimensions:** W 70 x D 60 x H 145 cm
- **Capacity:** 55 bushings
- **Supported bushing types:** ISO-50, CAPTO 8, VDI 30-40-50, HSK 80-100
- **Wheels:** 4 blue rubber wheels Ø 125 mm (2 fixed + 1 swivel + 1 swivel with brake)
- **Handle:** metallic for a secure grip
- **Structure:** monobloc, stable and resistant
- **Painting:** epoxy powder, color blue RAL 5010

User benefits:

- **Structure:** solid for safe bushing transport.
- **Capacity:** to accommodate up to 55 bushings of different types.
- **Wheels:** smooth-running with brake for controlled movement.
- **Ergonomic handle:** for easy transport.
- **Painting:** resistant against wear and chemical agents.

FAQ:

1. **How many bushings can the trolley contain?**
The trolley is designed to accommodate up to 55 bushings of different types.
2. **Are the wheels suitable for industrial flooring?**
Yes, the blue rubber wheels Ø 125 mm offer smooth movement and stability on industrial surfaces.
3. **Does the trolley arrive assembled?**
Yes, it has a monobloc structure and is ready for use.

4. **Is it available in other colors?**

The standard color is blue RAL 5010.

5. **Is the trolley suitable for mechanical workshops?**

Yes, it is designed to be used in workshops and industrial environments thanks to its resistant structure.

Mini buying guide:

To choose the **cone holder trolley** best suited to your needs, it is important to consider the **load capacity**, checking the number of bushings it can contain and the types supported.

The **wheels** must guarantee **stability and smooth movement**, especially in industrial environments.

An **ergonomic handle** facilitates transport and improves usability. Finally, a **powder-coated steel structure** guarantees long life and resistance to wear and chemical agents.
