

Metal planter for public spaces h140157

Metal planter for public spaces with internal container in grey fiberglass. Italian product.

Metal planter for public spaces designed for the decoration of condominium courtyards, avenues, squares and historic centers. The square shape is given by the four columns which have been enriched with connecting crossbars and internal crosses in square galvanized steel tube, and a central rosette on the outside. This continuity in shape has made it possible to place it in **architectural environments with square lines**.

Structure:

- n° 04 columns in square galvanized steel tube mm. 50 x 50 x 1.5 with decorative element at the top; each single column is equipped with a plate, at the base, in galvanized steel;
- connecting crossbars and internal crosses in square galvanized steel tube mm. 40 x 40 x 1.5. On the outside, the crosses are adorned with a decorative element;
- internal container made of fiberglass in "light grey" color.

Anti-corrosion treatments and finish

- **Pre-treatment:** before being painted, the product is pre-treated by spray washing with special degreasing liquids. After washing, the product to be painted is dried for 15 minutes in a dryer.
- **Anti-corrosion treatment:** in order to provide suitable protection against atmospheric agents, the product is subjected to a first painting cycle using a thermosetting powder anti-corrosive primer based on epoxy resins with special pigments.
- **First baking:** the product treated with the anti-corrosive primer is subjected to a first baking in the oven for 15 minutes at a temperature of 180°. In this phase the anti-corrosive polymerizes, forming a coating thickness of approximately 60 microns.
- **Painting:** the product is subjected to a final painting cycle with thermosetting powder based on polyester resins in "gunmetal grey" color. Painting is performed with electrostatic spray equipment, which allows the powder to deposit uniformly on the pieces, forming a minimum thickness of 60 microns.
- **Final baking:** the painted product is subjected to a final oven baking for 20 minutes at a temperature of 160°.

Dimensions:

- Total height: 72.5 cm
- Upper part width/depth: 70 cm
- Base dimensions: 75 x 75 cm
- total weight: 42 Kg

INFORMATION

- Length in millimeters 750.000000
- Depth in millimeters 750.000000
- Height in millimeters 725.000000
- Planter material metallo, vetroresina
- shape square
