

Metal tool holder trolley with 66 bushings h286_64

Steel sheet trolley for transporting 66 bushings. Blue rubber wheels Ø 125 mm and ergonomic handle. Dimensions: W 70 x D 60 x H 145 cm.

The **H286_64 tool holder trolley** is designed for the **organized and safe transport of bushings** in production departments, mechanical workshops, and metalworking industries.

Made of **sturdy steel sheet**, it guarantees **stability and long life**. It can accommodate up to **66 bushings**, compatible with **ISO 30-40 and HSK 63** standards, allowing for optimal tool organization.

The **blue rubber wheels Ø 125 mm** (2 fixed, 1 swivel, and 1 swivel with brake) ensure **smooth movement and stability**. The **ergonomic handle** facilitates transport, guaranteeing a safe and comfortable grip.

The **RAL 5010 blue epoxy powder coating** protects the trolley from **wear, rust, and chemical agents**, making it ideal for intensive use.

Trust the **H286_64 tool holder trolley** for efficient and safe transport of bushings! What are you waiting for, ask for a personalized quote now.

Technical features:

- **Material:** sturdy steel sheet
- **Dimensions:** W 70 x D 60 x H 145 cm
- **Capacity:** 66 bushings
- **Supported bushing types:** ISO 30-40, HSK 63
- **Wheels:** 4 blue rubber wheels Ø 125 mm (2 fixed + 1 swivel + 1 swivel with brake)
- **Handle:** metallic for a safe grip
- **Structure:** monobloc, stable and resistant
- **Painting:** epoxy powder, blue RAL 5010

User benefits:

- **Structure:** solid for safe transport of bushings.
- **Capacity:** to accommodate up to 66 bushings of different types.
- **Wheels:** smooth-running with brake for controlled movement.
- **Ergonomic handle:** for easy transport.
- **Painting:** resistant against wear and chemical agents.

FAQ:

- 1. How many bushings can the trolley hold?**
The trolley can accommodate up to 66 bushings compatible with ISO 30-40 and HSK 63 standards.
- 2. Are the wheels suitable for industrial flooring?**
Yes, the blue rubber wheels Ø 125 mm guarantee smooth sliding and stability even on industrial surfaces.
- 3. Does the trolley arrive already assembled?**
Yes, the trolley has a monobloc structure and is ready for use.

4. **Is it available in other colors?**

The standard color is RAL 5010 blue.

5. **Is the trolley suitable for mechanical workshops?**

Yes, it is designed for use in workshops, industries, and production departments, guaranteeing resistance and practicality.

Mini buying guide:

When choosing a **tool holder trolley**, it is important to evaluate the **load capacity**, choosing a model that can contain the number of bushings required.

The **wheels** must be of quality, guaranteeing smoothness and stability, especially in industrial environments.

The presence of a **brake** on one of the swivel wheels ensures greater control. Furthermore, a **sturdy steel structure** and a **protective coating** increase the trolley's durability over time.

Workshop tool holder trolley, metal bushing trolley, CNC tool trolley, ISO 30-40 bushing transport trolley, industrial trolley for tool cones, steel workshop trolley with wheels.
