

Metal totem with defibrillator cabinet h1043_61

White metal totem with defibrillator cabinet h1043_61 in carbon steel. Suitable for indoors and outdoors. Dimensions: 38 x 50 x H 190 cm.

The **metal totem with defibrillator cabinet h1043_61** is a stationary display and protection system on a dedicated pedestal, developed for **public administrations, municipal technical offices, corporate safety managers (RSPP), sports facility managers, and hospitality structures**. This device meets the need to make AED life-saving equipment immediately identifiable and accessible in both indoor and outdoor environments. The module solves the operational problem of **providing a robust and visible self-supporting stand, suitable for installing all types of defibrillator cabinets, offering wide surfaces for positioning hazard warnings and any advertising or general communications**. The pedestal and the case are made of sturdy carbon steel and subjected to heat and powder coating treatments at 180° to ensure maximum stability and protection from atmospheric agents.

Technical features

- **Product type:** display totem on dedicated pedestal complete with defibrillator cabinet
- **Totem compatibility:** designed for the installation of all types of defibrillator cabinets
- **Environmental placement:** suitable for outdoor or indoor positioning
- **Totem structure material:** PO2 carbon steel
