

Metal workbench with 2 drawers h286_70

Workbench h286_70 (200x70xH90 cm) in blue RAL 5010 steel with 43 mm wood top covered in sheet metal, 2 drawers and cabinet.

The **Metal workbench with 2 drawers h286_70** is a high-resistance monoblock workstation, designed for processing management and the secure storage of small parts and equipment in technical and industrial environments. This professional furnishing system solves the operational problem of organizing and storing components and tools, while ensuring a solid surface on which vices and shelves can be mounted. Aimed at maintenance workers, technicians, craftsmen and laboratory or production department managers, the workbench is made with a robust steel corner structure subjected to oven-baked powder coating in the standard blue RAL 5010 color. The upper surface features a 43 mm thick wooden top covered in sheet metal with 20 mm high perimeter edges on three sides, flanked by a lower sheet metal shelf also provided with edges. The structure has dimensions of 200 cm in width, 70 cm in depth and 90 cm in height. Internal organization includes 2 metal drawers sliding on nylon-covered ball-bearing guides, equipped with end-of-stroke stops and lock closure, and 1 metal cabinet complete with 1 fixed internal shelf with lock closure.

Technical features

- **Width:** 200 cm
