

Mobile bike charging station with advertising sign h503_39

Mobile bike rack charging station on wheels in galvanized and black RAL 9005 steel with a 1230x254 mm customizable advertising panel. Accommodates 3 to 6 bikes, equipped with 3 IP54 sockets and 2 charger supports.

The **mobile bike charging station with advertising sign** (model h503_39) is a mobile structure for bicycle parking, specifically engineered to provide an itinerant energy stop combined with a visual promotion channel. Developed for **municipalities, event organizers, trade fair managers, businesses, tourist promotion offices, and accommodation facilities**, this system meets the need to implement flexible infrastructure for electric and traditional micro-mobility. The device solves the operational problem of **temporary positioning of racks during events or seasonal peaks, ensuring simultaneous power supply for e-bikes and vehicle stability**, thanks to a frame on wheels equipped with adjustable locking devices. The structure is galvanized and painted in black RAL 9005 and integrates a customizable advertising panel at the top upon request, ideal for conveying institutional logos, sponsors, or street directions.
