

## Mobile phone locker h283\_79

10-compartment steel mobile phone locker, anti-theft closure, painted gray RAL 7035, for schools. Dimensions 30x35x175 cm. UNI EN 16121/16122 standard.

Mobile phone locker designed for school and public environments, where the security and organization of mobile devices are a priority. Made of **premium-quality steel** with an electro-welded monobloc structure, it provides reliable protection during lessons and school hours. It meets anti-theft security criteria and UNI EN 16121 and UNI EN 16122 standards.

The solution features **10 independent compartments**, each equipped with an autonomous opening for the secure storage of smartphones. The locking systems are highly configurable: a padlockable metal handle or a cylinder lock with a double key, both anti-theft.

The monobloc structure rests on an **accident-prevention polypropylene base**, ensuring stability and protection from accidental impacts. The doors are reinforced with invisible internal hinges, which can be inspected individually or via simultaneous opening (deactivatable upon request).

The surface treatment combines **iron phosphate and acrylic paints**, ensuring high resistance to corrosion, thermal shocks, and abrasion. Ventilation slots on the roof guarantee air circulation and keep the interior dry. **Gray RAL 7035** finish. Entirely manufactured in Italy.

## Technical characteristics

- **Structure:** Electro-welded monobloc, premium-quality steel.
- **Compartments:** 10 independent compartments, clear opening 15 cm (W) × 11.8 cm (H) per compartment.
- **Locking:** Padlockable handle or cylinder lock with double key (anti-theft).
- **Base:** Accident-prevention polypropylene base.
- **Finish:** Gray RAL 7035 (body and doors).
- **Anti-corrosion treatment:** Iron phosphate and acrylic paints, resistant to atmospheric agents, thermal shocks, and wear.
- **Hinges:** Invisible internal hinges when the door is closed; individual or simultaneous opening (deactivatable).
- **Ventilation:** Ventilation slots on the roof.
- **Dimensions:** W 30 cm × D 35 cm × H 175 cm.
- **Standards:** UNI EN 16121, UNI EN 16122; C.A.M. criteria.
