

Mobile polyethylene diesel tank h466_10

110-liter polyethylene mobile tank for diesel h466_10. Pneumatic wheels, aluminum manual pump, nozzle and 5 mm thickness.

The **Mobile polyethylene diesel tank h466_10** with a 110-liter capacity is a practical and resistant solution designed to facilitate refueling in mobile operational contexts. Ideal for construction sites, farms, and workshops, this tank solves the logistical problem of moving fuel on uneven ground, thanks to its pneumatic wheels and ergonomic handle dedicated to lifting and transport. Made of polyethylene with a thickness of 5 mm, the structure is designed without sharp corners and equipped with reinforced ribs, features that provide high robustness against impacts and stresses. The system is supplied ready for use and in total safety: it integrates a filling cap with a vapor vent, a safety ball valve, and an autonomous dispensing unit, consisting of an aluminum manual rotary pump, 3 meters of flexible hose, and a manual nozzle.

Technical specifications

- **Type:** Mobile trolley tank for diesel
- **Nominal capacity (Volume):** 110 liters
- **Overall dimensions (W x D x H):** 460 x 440 x 1100 mm
- **Structure thickness:** 5 mm
- **Empty weight:** 12 kg (diesel version)
- **Tank material:** Polyethylene with reinforced ribs and corner-free design
- **Handling system:** Ergonomic handle and pneumatic wheels suitable for any surface
- **Dispensing unit:** Aluminum manual rotary pump
- **Transfer accessories included:** 3-meter flexible hose and manual nozzle
- **Safety equipment:** Filling cap with integrated vent and safety ball valve
