

## Mobile waste container with central pedal opening h2090

70L mobile stainless steel waste bin with HACCP central pedal opening. Compact structure for professional under-counters in the food and healthcare sectors.

This **professional mobile waste bin** represents an advanced solution for waste management in environments requiring high hygiene standards and space optimization. Characterized by an innovative **central pedal opening**, the structure is specifically designed to be placed under worktops, eliminating the upper bulk typical of flip-top openings. Made with a **bright stainless steel** body, it integrates components in epoxy powder-coated steel to ensure mechanical and chemical resistance.

The movement system, composed of rubber wheels and an ergonomic handle, allows smooth movement even at full load, while the **removable front** facilitates maintenance and bag replacement operations, reducing operational times during cleaning phases.

## Technical characteristics

- **Body material:** Bright stainless steel
- **Pedal and handle material:** Steel with epoxy coating
- **Opening system:** Central pedal (HACCP compliant)
- **Volumetric capacity:** 70 liters
- **Dimensions:** 55 cm (width) x 52 cm (depth) x 72.5 cm (height)
- **Mobility:** Non-marking rubber wheels and push handle
- **Accessibility:** Removable front panel
- **Bag stability:** Perimeter bag retainer elastic included
- **Production:** Made in Italy
