

Modern bike rack for urban furniture h140_536

Bike rack for urban furniture, in galvanized and painted steel. Dimensions: W 44 x D 30 x H 86 cm.

The **modern bike rack for urban furniture H140_536** is an elegant and robust solution for the safe parking of bicycles in public and private contexts. Designed to accommodate up to **2 bicycles**, its minimalist design and **clean lines** make it easily integrated into both modern architectural projects and historical contexts, without compromising functionality.

The structure is made **entirely of Ø 60 x 2 mm galvanized steel round profile**, a material resistant to atmospheric agents and treated with an accurate cycle of **anti-corrosion finishes**: washing and degreasing, sandblasting, application of anti-corrosive powder primer and polymerization, followed by colored painting (**matte zinc yellow RAL 1018**) and final baking. This process ensures **long-lasting protection against rust** and maintains an impeccable aesthetic appearance over time.

The bike rack, thanks to its structure, is suitable not only for bicycles but also for **scooters and motorcycles**, offering versatility of use in different urban scenarios. It is supplied **already assembled** and does not require screws for fixing; installation is carried out via **cementing** for maximum stability.

With a weight of **12 kg**, it is solid and secure, but not excessively bulky: the height of 86 cm, the width of 44 cm and the depth of 30 cm allow for optimizing space without sacrificing parking convenience.

Make urban space more functional and orderly with the H140_536 bike rack: **order now or request a quote for multiple supplies**.

Technical specifications:

- **Capacity:** 2 spaces
- **Material:** Galvanized steel Ø 60 x 2 mm
- **Finish:** RAL 1018 thermosetting powder coating
- **Treatments:** Washing, sandblasting, anti-corrosive primer, polymerization and colored finish
- **Dimensions:** W 44 x D 30 x H 86 cm
- **Weight:** 12 kg
- **Installation:** By cementing
- **Delivery:** Product already assembled
- **Certifications:** ISO 9001:2015, UNI EN ISO 3834-3:2021, Transformation Center DM 14/01/2008

FAQ:

1. **How many bicycles can it accommodate?**
It can accommodate up to 2 bicycles simultaneously.
2. **Is it also suitable for scooters or motorcycles?**
Yes, the structure allows for the fixing of different types of two-wheeled vehicles.

3. How is the installation carried out?

Via cementing into the ground, to ensure maximum stability.

4. Does the product arrive disassembled?

No, it is delivered already assembled, ready for installation.

5. What type of anti-corrosion treatment has been applied?

Complete cycle with washing, sandblasting, primer and thermosetting powder coating with polymerization at 180°C.

Mini buying guide:

When choosing a bike rack for urban furniture, it is important to consider **resistance**, **aesthetics** and **capacity**.

The H140_536 model, with its **clean design** and **advanced anti-corrosion treatments**, guarantees long life even in difficult climatic conditions.

The **galvanized steel structure** offers solidity, while the **RAL 1018 painting** provides visibility and a distinctive aesthetic touch.

Fixing via cementing ensures stability, preventing theft or accidental movement. Perfect for public areas, bike paths, schools, squares and high-traffic private spaces.
