

Modern concrete drinking fountain for urban furniture h319_136

Modern concrete drinking fountain with sandblasted finish, 500x430x1050 mm. Resistant monoblock structure with provision for internal plumbing system.

This **modern concrete drinking fountain** represents an advanced technical solution for the furnishing of outdoor spaces that require high resistance and durability. The structure is designed to effectively resist mechanical stress and thermal variations typical of public environments, ensuring a long operational life in high-pedestrian traffic contexts. The surface finish with a **sandblasted/washed effect** not only defines its contemporary aesthetics but also offers a surface less subject to visual degradation caused by pollutants.

Technical features
