

Modern umbrella stand with two handles h957_29

Professional umbrella stand in cold-rolled sheet metal, Ø 21.5 x H 50 cm, with two integrated handles and water collection tray for HoReCa environments.

The **modern umbrella stand H957_29** is a technical furnishing accessory designed to ensure order and safety at the entrances of professional structures. The structure is characterized by **two integrated handles** in the main body, a functional solution that facilitates moving the container during cleaning operations or the reconfiguration of spaces in hotels, restaurants, and offices. The compact cylindrical design optimizes the footprint, making it suitable even for entrances and receptions with limited space.

Technical features

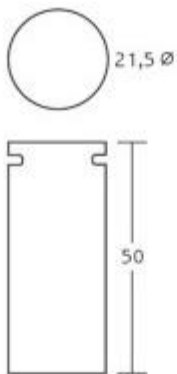

- **Main material:** High-quality cold-rolled white sheet metal (DC01, EN10130 standard)
- **Base:** Impact-resistant high-density polyethylene finish
- **Collection system:** Impact-resistant polystyrene water collection tray, removable for emptying and maintenance
- **Mobility:** Double ergonomic handle integrated into the structure
- **Painting:** Polymerization at 200°C for 20 minutes (60 micron thickness) with fireproof polyester resin
- **Fire resistance classification:** Complies with UNE EN 13501 (A2-s1, d0) and UNE 23727 (M1) standards
- **Dimensions:** Ø 21.5 cm x Height 50 cm
- **Operating weight:** 1.6 kg
- **Compliance:** Abrasion and impact resistance tests passed according to current regulations

Available versions: The product is supplied in various color variants for aesthetic integration into any architectural context.
