

Modular castle play system for children h735_24

Castle made with a modular system and square cubes. Overall dimensions: 280 x 280 x 125 cm.

With the **modular system castle**, made from **square and triangular panels** and **tunnels** in **bright and uniform colors**, you can create magical and enchanted places, where little ones can unleash their imagination by playing in groups. Ideal for placement in outdoor play areas of schools or sports facilities, it is robust and solid, with a structure made of plastic material resistant over time, even to prolonged exposure to UV rays and atmospheric agents. Equipped with **UNI EN 1176-1/3 certification**. The elements that make up this colorful and creative castle are **4 cubes**, of which **2 with roofs**, and **4 tunnels Ø 50 cm**. The cubes are designed from **square and triangular panels**. The **square panels** include **holes of different diameters**, useful both for children's entry and for connecting the various elements.

Technical characteristics:

- Modular assembly play system
- Construction material: high-resistance plastic
- Color resistance to UV rays and atmospheric agents
- 8 panels with Ø 50 cm hole
- 14 panels with Ø 40 cm hole
- 8 triangles
- 4 tunnels Ø 50 cm
- Overall dimensions: 280 x 280 x h. 125 cm
- Quick and easy assembly
- Equipped with UNI EN 1176-1/3 certification
